Restriction:

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-12, drawn to multiple network interconnecting, classified in class 709, subclass 249.

II. Claims 13-20, drawn to method of placing a call, classified in class 709, subclass 227 and class 379, subclass 191.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the invention I has a separate utility such as inter-architecture network utilizing a common protocol. The invention II, on the other hand, has a separate utility such as making a phone call between two parties across the network.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the technological complex art, examination of all inventions would impose serious burden to the examiner. Accordingly, restriction for examination purposes as indicated is proper.
